PROFILE

Software developer specialized in **.NET and C#**: backend, integrations and automation. Experience designing, building and deploying end-to-end systems to production, integrations with third-party services, and applications supporting critical operations.

TECHNICAL SKILLS

- **Backend:** C#, .NET and .NET Core, ASP.NET Core, REST APIs, SOAP, Quartz.NET
- **Data:** SQL Server, T-SQL, ADO.NET, SQLite, offline/online synchronization
- **Desktop and mobile:** WPF/MVVM, WinForms, .NET for Android, Xamarin.Forms
- **Cloud and integrations:** Azure, MercadoPago, third-party service integration
- **Currently learning:** Vue 3 · DevOps

EXPERIENCE

Software Developer | Tecnisegur (cash-in-transit)

April 2024 – September 2026

- Designed and built **TAAS** from scratch, a .NET system that automates the processing of **around 1,500 bank deposit transactions per day**, without manual intervention during normal operation and with **over a year in production**.
- Integrated **six banks through four different delivery mechanisms** — from files dropped into a shared folder to web services — and consumed an external provider's web service to retrieve and persist deposit data internally, with manual recovery for failed transactions.
- Developed the **Android app used to track cash shipments**: seal scanning at each step, state changes, and a record of who did it, when and where. **Designed for prolonged offline operation**, storing data locally and reconciling with the server once connectivity is restored. Migrated from Xamarin.Forms to .NET for Android and published on Google Play.
- Built an **internal REST API integrated with MercadoPago** for subscriptions and checkout, handling successful, failed, reversed and expired payments, along with renewals and cancellations.
- Maintained and extended the **internal ERP**, adding new forms for HR, Sales, Billing and Treasury (*WinForms*).

IT Support Technician | Advansys – Cars Solutions (automotive software)

May 2017 – December 2023

- Developed and maintained internal business applications using **GeneXus** for roughly a year.
- Kept IT operations running for the rest of the period, covering end-user support, networks, infrastructure and continuity of internal systems.

Sabre Holdings | Technical Support – Help desk

Enero 2015 – Febrero 2016

- Help Desk brindando soporte técnico para solucionar problemas de software y hardware de los clientes.

PERSONAL PROJECTS

Multiplayer Game Server — .NET / Unity

- Built a client-server multiplayer architecture with authentication, server-authoritative movement and combat, character persistence, and zone-based visibility.

EDUCATION

- **Analista Programador** (Software Development) — Universidad ORT Uruguay, 2025.
- **Cybersecurity Certification** — Universidad ORT Uruguay, 2025 (OWASP Top 10, ISO, NIST).
- **DevOps training** — Universidad ORT Uruguay, in progress (2026).

LANGUAGES

- **English** — B2 certified (Cambridge FCE) · Preparing for Cambridge C1 Advanced (CAE)
